

EXPERIMENT NO: 13

Determination and plotting of intrinsic impedance and phase velocity of various medium

Aim:

To determine and plot intrinsic impedance and phase velocity of various medium.

Software required:

- SCILAB version 6.0.1

Program:

```

Theoretical calculation:

EXP NO : 13

Determination and plotting of intrinsic impedance and phase velocity of various medium.

Output :

Enter μ_r value = 3×10^{-6}

Enter ϵ_r value = 6×10^{-6}

Practical Output :

" Intrinsic Impedance = 251.156206 Ohm "

" Phase Velocity = $8.327657 \times 10^6 \text{ m/s}$ "

Theoretical Calculation :

Intrinsic Impedance : $\eta = \sqrt{\frac{\mu}{\epsilon}}$

Taking approximately,

$$\mu = 3 \times 10^{-6} \text{ H/m}$$

$$\epsilon = 4.76 \times 10^{-11} \text{ F/m}$$

Therefore,

$$\eta = \sqrt{\frac{3 \times 10^{-6}}{4.76 \times 10^{-11}}}$$

$$\eta = \sqrt{63025.2}$$

$$\eta = 251.05 \Omega$$

Phase velocity :

$$v = \frac{1}{\sqrt{\mu \epsilon}}$$

$$v = \frac{1}{\sqrt{(3 \times 10^{-6}) (4.76 \times 10^{-11})}}$$

$$v = 8.37 \times 10^6 \text{ m/s}$$

$$v = 8.33 \times 10^6 \text{ m/s}$$

Intrinsic Impedance = 251.05Ω

phase velocity = $8.33 \times 10^6 \text{ m/s}$

Case 1: To determine the intrinsic impedance and phase velocity of electromagnetic waves in free space(vacuum).

The screenshot displays the SciLab 2026.1.0 software interface. The main window is titled "SciLab 2026.1.0 Console". It features a menu bar at the top with options: File, Edit, Control, Applications, and a help icon.

On the left side, there is a "File Browser" pane showing the file system structure under "C:\Users\User\Documents\". The contents include folders like "Documents", "My Music", "My Pictures", "My Videos", and files like "ex 6.sci" and "EXP 13.sci".

The central console area shows the execution of a script:

```
"Intrinsic Impedance eta (Ohms)!"  
0.0142898 + 0.0142898i  
"Phase Velocity vp (m/s)!"  
2.998D+08
```

To the right of the console is the "Variable Browser" pane, which lists variables and their properties:

Name	Value	Type	Visibility	Memory
epsilon	8.85e-12	Double	local	216 B
epsilon_0	8.85e-12	Double	local	216 B
epsilon_r	1	Double	local	216 B
eta	0.0143 + ...	Double	local	224 B

mu	1.26e-06	Double	local	216 B
omega	1.88e+10	Double	local	216 B
sigma	5.8e+07	Double	local	216 B

Below the Variable Browser is the "Command History" pane, showing a sequence of commands executed:

```

At the bottom right is the "News feed" section, titled "Discover SciLab community". It contains the text: "SciLab is open source. Giving back support or use cases is appreciated." Below this text are several links and suggestions:

- Add and improve functions on [GitHub](#).
- View and edit [help pages](#).
- Publish toolboxes on [ATOMS](#).
